EDUCATION

Southeastern Louisiana University

Bachelor of Science in Computer Science

Data Science Concentration, Minor in Mathematics

Hammond, Louisiana

Expected Graduation, May 2027

- **Related Coursework:** Data Structures & Algorithms, Software Engineering, Database Systems, Machine Learning, Capstone, Computer Architecture
- **GPA:** 4.0/4.0

EXPERIENCE

Amazon Web Services

Cloud Support Engineer Intern

Dallas, Texas

May 2026 – August 2026

- Return internship focused on cloud infrastructure, distributed system architectures, and AWS services.
- Continuing to build AI projects on AWS.

Cloud Support Associate Intern

June 2025 – September 2025

- Resolved distributed systems, Linux, and networking issues in cloud infrastructure environments while improving cloud architectures.
- Built an OpenSearch Troubleshooting Chatbot using Lex V2, Lambda, OpenSearch, CloudWatch, API Gateway, S3, and CloudFront to automate 9 troubleshooting workflows and reduce time-to-resolution for common issues.
- Designed and deployed a Highly Available Web App architecture networked across 3 Availability Zones using VPC, ALB, EC2, Auto Scaling, and IAM.
- Earned AWS AI Practitioner and AWS Solutions Architect – Associate certifications.

Louisiana Army National Guard

Motor Transport Operator

Slidell, Louisiana

October 2022 – Present

- Transporting troops and equipment with a 100% on-time delivery rate.
- Managing 57 vehicles/trailers through preventative maintenance.

PROJECTS

MedAI – AI Healthcare Coworker (Python, Bedrock, PostgreSQL, ECS, Terraform)

- Led backend development for a capstone project built with our industry client DSS Inc.
- Built an LLM orchestrator that gives Claude models access to use company documents (RAG) and patient data (MCP) for its responses.
- Integrated Server-Sent Events streaming, Cognito JWT authentication, PostgreSQL conversation persistence, and AWS ECS/Fargate deployment.

Real-Time Multiplayer Game & Chat Server (Rust, Axum, Tokio, WebSockets)

- Built an asynchronous WebSocket server supporting concurrent game updates, stateful game sessions, and in-game chat with real-time updates.

Fitness & Nutrition Tracker Web App (C#, React, ASP.NET, SQL, Git)

- Built a full-stack web app with a relational database schema, a backend REST API in C# (.NET), and a React frontend.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, Java, Rust, C#, SQL
- **Backend:** FastAPI, .NET, REST APIs, Server-Sent Events, WebSockets
- **Infrastructure:** AWS, Bedrock, Cognito, ECS/Fargate, RDS, Lambda, Docker, Terraform
- **Concepts:** Data Structures & Algorithms, Distributed Systems, System Design, AI application architecture, LLM Orchestration
- **Tools:** Claude Code, Codex, Git, GitHub, Linux
